

NAYIRI SARKIS INJEYAN

OBJECTIVE

Working autonomously and effectively as part of a multi-disciplinary team, resourceful, but responsive to change while achieving collective objectives in the caring and development of patients. Possessing strong listening skills with the ability to make decisions and solve problems, besides initiating and promoting services and increasing personal and professional standards. In addition to treating a range of people from various cultures and ages. I am looking forward to make a continuous contribution within professional practice in the community.
