The Japanese Nursing Association (JNA) certifies nurses in three categories: Certified Nurse, Certified Nurse Administrator and Certified Nurse Specialist. All three levels of certification require that the nurse pass the national nursing examination as well as a certification test administered by the JNA. Certifications must be renewed every five years. Requirements of Nursing education in Japan are that candidates have completed twelve years of basic academic study and then three years of basic nursing education. Public health nurses and midwives require a minimum of one additional year of specialized study. After completing their studies, students must pass the national licensing examination and obtain a license from the Minister of Health, Labor, and Welfare in the case of nurses, or from the prefectural governor, for nurse assistants. Foreign nurses who wish to work in Japan are required to pass the licensing examination and obtain a Japanese nursing license.

Certified Nurses (CN) are required to take six months training in cancer and chemotherapy nursing, emergency care, hospice care, intensive care nursing, wound, ostomy, and continence nursing, and pain management nursing,[15] after completion of their basic nursing licensing.
